

Soundtrack Israel is committed to combating illegal robocalls and ensuring the integrity of our communication services.

Our Robocall Mitigation Efforts include:

- **Call Blocking:** Utilizing advanced analytics to identify and block suspicious call patterns.
- **Customer Education:** Providing resources and support to help our customers recognize and report illegal robocalls.
- **Collaboration with Authorities:** Working closely with regulatory bodies and law enforcement to trace and mitigate illegal robocall sources.

Technical and Operational Details:

- **Integration:** Our systems are integrated with industry-standard databases and tools to ensure real-time call authentication and mitigation.
- **Monitoring and Reporting:** We continuously monitor call traffic and maintain detailed records of our mitigation efforts, which are available for review upon request.

Soundtrack Israel is dedicated to maintaining the highest standards of service and compliance. We believe our inclusion in the Robocall Mitigation Database will further enhance our ability to protect our customers and uphold the integrity of our network.
