FCC Registration Number (FRN): 0035545755

Date of Submission: 11/21/2024

1. Introduction

Boyett Enterprises LLC DBA Blue Streak Couriers is a logistics and transportation company serving the United States. While we do not provide voice services to end users or resell voice services, we utilize voice services internally for business operations, customer support, and vendor communication. In compliance with the Federal Communications Commission's (FCC) requirements, this document outlines our robocall mitigation efforts.

2. Use of Voice Services

We do not originate, resell, or provide voice services on behalf of or as a service for third parties. Voice service destination traffic is strictly limited to company controlled internal contacts.

3. Robocall Mitigation Practices

Although we are not a voice service provider, we take the following steps to mitigate illegal robocalls:

Vendor Oversight

We ensure that all contracted voice service providers are compliant with FCC regulations, including STIR/SHAKEN implementation and robocall mitigation requirements.

Internal Policies

Employees are prohibited from engaging in activities that could result in the origination of illegal robocalls. Internal audits are conducted to monitor outbound call patterns for unusual activity.

Technology Measures

Use of call authentication technologies (e.g., STIR/SHAKEN) provided by our service providers. Deployment of spam and robocall detection tools on internal voice systems.

Incident Response

A clear process for identifying and addressing any instances of potential illegal robocalls originating from our systems.

4. Commitment to Compliance

Boyett Enterprises LLC is committed to ensuring the integrity of its voice communications and will continue to work closely with its service providers to comply with all FCC robocall mitigation requirements.
