SMALL ENTITY Robocall Mitigation Plan

We are a Non-facilities-based small voice service provider is defined as "a small voice service provider that is offering voice service to end-users solely using connections that are not sold by the provider or its affiliates."

Our carrier has implemented STIR/SHAKEN throughout its network to meet requirements.

Tel-Tech certifies we will not spoof numbers and send across any outbound caller ID to the carrier network that is not owned by the customer.

In the event a customer try's doing this on their own, or the carrier does not block this from happening, we will assist and comply with any records or help the FCC needs from us.
