Robocall Mitigation Document

Pursuant to 47 C.F.R. § 64.6305 MickTel LLC submits this report on its implementation of the STIR/SHAKEN call authentication framework and its plan to prevent and mitigate illegal robocalls. This report describes the status of its implementation of STIR/SHAKEN and the practices and procedures MickTel LLC (hereinafter also referred to as “company name abbreviation” or “the company”) has in place to mitigate illegal robocalls. The company may modify, add, delete or otherwise alter any of the policies and procedures described in the plan at any time to respond to changes in its business, its capabilities and its needs.

MickTel LLC is / is an Affiliate, subsidiary or parent company of Micktel Hosted LLC. The company has not ever been sold or acquired by another company. The role the company plays in the network is Non-Gateway Intermediate Provider has voice and voip traffic for hotels on its network.

MickTel LLC has fewer than 100,000 subscribers and is therefore eligible for the STIR/SHAKEN implementation exemption for small carriers under 47 CFR § 64.6304. The company requires this extension to complete the implementation of the STIR/SHAKEN technology. MickTel LLC is a reseller of voice services and pays upstream providers to manage the technical side of their network. MickTel is judiciously working to prevent unlawful robocalls from originating on its network while in the process of installing the new STIR/SHAKEN authentication architecture. In the meantime, MickTel has implemented the following robocall mitigation plan to address unlawful robocall traffic: The Officers of the company are: Jana Beck, Senior VP of Operations.

MickTel LLC is judiciously working to prevent unlawful robocalls from originating on its network and has implemented the following robocall mitigation plan to address unlawful robocall traffic. The company has implemented the following robocall mitigation plan to address unlawful robocall traffic:

MickTel LLC has enforceable terms of use and/or an acceptable use policy noted in its contracts. These policies define the circumstances by which the company will deny, suspend, or terminate service to a customer. The company has a vetting and review process for upstream providers, that is, providers that send the company voice traffic that it terminates or transits to other providers.

MickTel LLC confirms that the upstream providers have a certification in the Robocall Mitigation Database. The company will not accept voice traffic from an unregistered provider. The Company has been informed of the upstream providers “Know-Your-Customer” guidelines and have provided them with the necessary KYC documentation they’ve requested that the company completes.

MickTel LLC follows the caller ID authentication best practices for vetting caller identity and operational legitimacy for new and existing customers as described by the NANC Call Authentication Trust Anchor Working Group.

This process includes the collection and review of entity-identifying information to confirm that the company has an authenticated relationship with the customer. The Company uses this authenticated information to determine whether the customer is subject to any enforcement actions that restrict the type of calling that they may do, for example, if they have been banned from initiating telemarketing calls.

MickTel LLC also validates, when possible, that the entity has a legitimate right to use its asserted calling numbers. The Company uses this information to support the attestation level it assigns to calls that it originates for that customer.

MickTel LLC contractual provisions with customers prohibit them from initiating illegal robocalls. If the Company discovers a customer is initiating suspicious robocalls, it warns them to stop. If such traffic continues, then the Company terminates their service.

MickTel LLC requires that upstream providers have a reasonable Robocall Mitigation Plan, including a vetting process for their customers as well as their upstream providers, and that they use call analytics to identify suspicious traffic.

Prior to installing services for new customers, the company takes the following measures to weed out end users that could potentially generate robocall traffic:

The Company uses a KYCs to confirm the following information for its customers:

- Customer's identity
- Customer's right to use the telephone number presented on calls
- Service Address
- Credit History
- Authentic and Legal Campaigns

When the customer is a business, MickTel LLC also requires Business Incorporation Documents and verifies they have a reputation as a valid business that abides by the law.

MickTel LLC uses call analytics software provided by their upstream provider VOIP routes to monitor all outbound voice traffic in real-time to prevent the origination or transit of illegal robocalls.

The software provides detailed reporting to identify suspected illegal robocalls. The system alerts the company if it processes outbound calls where the calling number has a poor reputation or is invalid, unallocated, or on a Do Not Originate list. The Company will immediately investigate any identified suspicious calls to determine if the caller or upstream provider was attempting to originate or transit unlawful robocalls. If the Company determines that the traffic was likely unlawful, then the company will warn them to stop sending such traffic. If they continue to send traffic that appears to be unlawful, then the company will terminate their service.

MickTel LLC will comply fully with all conditions set forth in the FCC'S 2024 Report and Order mandating the implementation of the STIR/SHAKEN framework, as well as with the Commission's rules and policies more generally.

MickTel LLC has designated an individual as a dedicated point of contact for addressing traceback requests. RMD Contact is Jana Beck, jana@micktelllc.com. It has either provided the ITG with the contact information and business hours for those individuals, or will do so upon receipt of the first request from the ITG. See <https://www.ustelecom.org/the-industry-traceback-group-itg/for-providers/>. The Company will respond promptly to inquiries from the Industry Traceback Group (ITG) within 24 hours.

If a pattern of questionable activity is detected MickTel LLC will require its customer to remedy the problem and, if effective action is not taken, service to the customer may be suspended and/or terminated.

Requests from the ITG must be submitted in writing and include the following information:

Company Name:

Company Address:

Phone Number in Question:

Requestor's Name:

Requestor's Title:

Requestor's phone number:
