

We are at VoipSync taking care of STIR/SHAKEN Implementation and we are working on it's to develop the few things to Identify the callers information.

We are VoipSync is a small retailer or intermediate of voip or sip calls providers.

We are fully verifying the caller with the ID verification of the caller. And also measures the terms the use of voip service.

We are at VoipSync not providing the voip service to any randomly coming users, at our end all customers have to verify their Identity with the documents such as driving license.

We are at VoipSync is understands the regulatory rules of using the voip services and we also here to support to stop the fraud/robocalls.

We are at VoipSync will try our best to verify the Caller Identification Information, before providing any voip services.

We are at VoipSync serving to few users or caller our voip service because we wanted to stop unknown fraud calls traffic.
