Robocall Mitigation Program

Medi-code will never allow any robocalls to be included with any service the company provides. Medi-code will only call phone numbers to people that have an existing business relationship with the company or have had an existing business relationship with the company within the last 18 months.

If anyone called from the company requisitions never to be called again, the company will add that phone number to our internal Do Not Call List. No outbound calls are allowed from our phone system to any numbers listed in our internal Do Not Call List.
