

Exemption Description for STIR/SHAKEN Compliance

Exemption Description

We are certifying under the Partial STIR/SHAKEN Implementation or No STIR/SHAKEN Implementation category, based on the exemption outlined in 47 CFR § 64.6304. Our company qualifies as a Small Voice Service Provider because we currently serve fewer than 100,000 voice lines. We have also recently become a certified Resporg (Responsible Organization) and are in the process of scaling up our network and infrastructure to meet full STIR/SHAKEN compliance.

Rolling out STIR/SHAKEN across our entire network is both technically and financially challenging at this stage. As a result, we are taking a phased approach, focusing first on strengthening our robocall mitigation efforts during this transition period.

Reason for Exemption Application

New Resporg Certification:

We are a newly certified Resporg, currently establishing partnerships with carriers and upgrading our network. We are committed to achieving full STIR/SHAKEN compliance within the timelines set for small voice service providers.

Resource Challenges:

As a small provider, implementing STIR/SHAKEN across the entire network immediately would create a heavy financial and operational burden. We are working to allocate resources and build the necessary technical capacity to roll out the framework gradually and effectively.

In the meantime, we are fully committed to preventing illegal robocalls through robust mitigation measures and will respond promptly to any traceback requests.

Exemption Description for STIR/SHAKEN Compliance

This approach ensures we remain compliant with regulatory requirements while working toward full implementation.
