

BYTEME NETWORKS, LLC Robocall Mitigation Plan

1. Company Identification

BYTEME NETWORKS, LLC ("ByteMe Networks") is a U.S.-based voice service provider and complies with the requirements of the TRACED Act and applicable rules of the Federal Communications Commission (FCC), including 47 CFR § 64.6300 et seq.

2. STIR/SHAKEN Implementation Status

ByteMe Networks is implementing STIR/SHAKEN caller ID authentication where technically feasible. We rely on our upstream carrier, ClearlyIP, for authentication and attestation of outbound calls where applicable. We operate a FreePBX-based platform and are actively working toward direct STIR/SHAKEN signing capabilities including STI certificates and infrastructure integration. For traffic not yet authenticated, our mitigation program applies.

3. Robocall Mitigation Program

ByteMe Networks has implemented a robocall mitigation program designed to prevent the origination of illegal robocalls.

- Continuous monitoring of outbound call patterns and anomalies
- Detection of spoofing, robocall signatures, and suspicious behavior
- Call blocking and labeling aligned with FCC safe harbor provisions
- Customer vetting procedures including identity and use case validation

4. Traceback Cooperation

ByteMe Networks responds promptly to all traceback requests from the FCC, law enforcement, and the USTelecom Industry Traceback Group and fully cooperates in investigations.

5. Call Abuse Prevention Policy

Any call originated on the ByteMe Networks network may be inspected and investigated. Fraudulent or illegal calls may be blocked immediately. Repeated violations may result in suspension or termination and referral to regulatory authorities.

6. Mitigation of Non-Compliant Traffic

ByteMe Networks investigates and mitigates illegal robocall activity through blocking, restriction, suspension, and cooperation with enforcement authorities.

7. Additional Safeguards

- No high-volume outbound traffic is permitted without vetting
- Strict onboarding and monitoring controls are enforced
- Proactive abuse detection measures are in place

8. Affirmation

ByteMe Networks affirms this mitigation program is actively enforced and that all information provided is accurate to the best of our knowledge.
