

Motion Meetings Robocall Mitigation Plan

1. Company Information

- **Company Name:** Converso Inc. (Motion Meetings)
- **Address:** 1600 – 401 Bay St
- **Contact Person:** Carl Mavromichalis
- **Email:** carl@motionmeetings.com
- **Phone Number:** 416-420-2352

2. Role in the Call Chain

Motion Meetings provides robocalling services, among others, exclusively for governments, elected officials, and member-based organizations in Canada. We are **not a self-service provider**; all robocalls are handled internally by our team. Motion Meetings **does not originate calls directly to the PSTN** but instead utilizes **Telnyx** as our upstream service provider. Telnyx is responsible for call origination and STIR/SHAKEN compliance.

3. Basis for Exemption from STIR/SHAKEN Obligation

Motion Meetings is **not required to implement STIR/SHAKEN** under **47 CFR § 64.6304(d) and § 64.6301(a)** because:

- We do not have direct access to North American Numbering Plan (NANP) resources.
- We do not originate calls independently but instead **use Telnyx for call initiation**.
- We do not have a direct connection to the Public Switched Telephone Network (PSTN).
- Telnyx is the entity responsible for STIR/SHAKEN implementation.

4. Robocall Mitigation Practices

Although Motion Meetings does not have a direct STIR/SHAKEN obligation, we adhere to stringent robocall mitigation practices, including:

- **Customer Vetting & Approval:** We work exclusively with verified governmental, political, and member-based organizations, ensuring our clients comply with legal communication standards.

- **Message Content Compliance:** All robocall messages are reviewed for compliance with **CRTC regulations governing Automatic Dialing and Announcing Devices (ADAD)** before transmission.
- **Traffic Monitoring & Anomaly Detection:** Our team actively monitors outbound call traffic for irregularities that could indicate misuse or unauthorized activity.
- **Internal Review & Auditing:** We regularly audit our processes to ensure compliance with applicable laws and best practices in telecommunication security.

5. STIR/SHAKEN Authentication

Since Motion Meetings relies on Telnyx to originate calls, all STIR/SHAKEN authentication is handled by Telnyx. Telnyx signs calls in compliance with FCC regulations and industry best practices.

6. Commitment to FCC Compliance

Motion Meetings is committed to preventing illegal robocalls and ensuring compliance with all applicable telecommunications regulations. We cooperate fully with regulatory authorities and take immediate corrective action in the event of any compliance concerns.
