

Robocall Mitigation Program for Speechbolt

8 March 2025

- **Company Name:** Speechbolt LLC
- **FCC Registration Number (FRN):** 0036771079
- **Filing Type:** Partial STIR/SHAKEN Implementation
- **Primary Contact:** Joshua Reola, CEO, +1-628-895-9624
- **Business Address:** 30 N Gould St Ste R, Sheridan, WY 82801

1. Overview of Speechbolt's Robocall Mitigation Efforts

Speechbolt, Inc. is committed to mitigating illegal robocalls and preventing the transmission of unlawful traffic through our platform. As a provider of innovative call management and filtering solutions, we actively implement policies and procedures to identify, monitor, and reduce unlawful robocalls in compliance with **47 CFR § 64.6305(c)**.

Our robocall mitigation program is designed to:

- Detect and prevent illegal robocalls from being processed on our network.
 - Cooperate fully with the FCC, law enforcement agencies, and the industry traceback consortium.
 - Implement proactive measures to prevent unauthorized or unlawful traffic.
-

2. Implementation of STIR/SHAKEN & Call Authentication

Speechbolt is not a voice service provider that originates or terminates calls but rather functions as an intermediary AI-based spam filtering system. As such, we do not directly implement STIR/SHAKEN protocols but work within the framework by:

- Partnering with telecom providers that implement STIR/SHAKEN.
- Validating call authenticity by leveraging analytics and third-party verification services.
- Ensuring flagged calls are properly categorized based on verified STIR/SHAKEN data.

Because we do not originate or terminate calls, we **certify under Option 3 (No STIR/SHAKEN Implementation)** while maintaining an internal robocall mitigation program to prevent the transmission of unlawful traffic.

(Confidential - Submitted for FCC Compliance)

3. Robocall Mitigation Practices

Speechbolt's mitigation strategy consists of the following key practices:

A. Call Verification and Filtering

- Calls are analyzed using a proprietary filtering system to detect characteristics of illegal robocalls.
- Calls suspected of being spam or fraudulent are flagged for further review.
- User-driven reporting tools allow for crowdsourced intelligence to improve filtering accuracy.

B. Traffic Monitoring and Pattern Detection

- Continuous monitoring of call traffic for anomalies and signs of mass robocalling.
- Algorithmic detection of call patterns indicative of unlawful activity.
- Immediate action taken against identified sources of illegal robocalls.

C. Compliance with Traceback Requests

- Speechbolt fully cooperates with traceback investigations initiated by the FCC, law enforcement agencies, and the Industry Traceback Group (ITG).
- We respond to traceback requests within 24 hours as required by the FCC.
- If illegal robocalls are traced back to our platform, we will take appropriate enforcement action.

D. Evolving Mitigation Efforts

- Our robocall mitigation methods continue to evolve based on emerging threats.
- We utilize cutting-edge technologies, including AI-driven detection and real-time analytics, to refine our approach.
- Speechbolt remains committed to ongoing updates and compliance with regulatory best practices.

4. Compliance with FCC Requirements

Speechbolt is committed to full compliance with FCC regulations, including:

- All calls processed through our platform are subject to a robocall mitigation program in compliance with 47 CFR § 64.6305(c).
- We will fully cooperate with the FCC, law enforcement, and the Industry Traceback Group (ITG) in investigating and stopping illegal robocalls.

(Confidential - Submitted for FCC Compliance)

- We will immediately take corrective action if any illegal robocall activity is detected on our platform.
 - Our team monitors and enforces our policies continuously to prevent unauthorized robocall traffic.
-

5. Commitment to Consumer Protection

Speechbolt is dedicated to:

- Educating consumers about robocall fraud and TCPA rights.
- Advocating for stronger enforcement of anti-robocall regulations.

6. Certification

I certify that Speechbolt LLC has implemented a robocall mitigation program that meets the FCC's requirements and will continue to **monitor, update, and enforce compliance** within our network.
