

PER OUR PARTNER PAM – JARED:

All the partners have to do is write a document that outlines their place in the STIR/SHAKEN ecosystem, which is that they Know Their Customers and they hand attestation off to SkySwitch.

As indicated in the FCC's Robocall Mitigation Database, the Provider's status with respect to STIR-SHAKEN implementation is as follows: • The Provider is a reseller of services, knows their customers and the phone services originating from a partner CoreDial & Skyswitch network.

We hand attestation off to CoreDial and Skyswitch who have fully implemented STIR/SHAKEN And ensure clients are not originating illegal robocalls.

- For calls originating from the CoreDial network, CoreDial will make attestation level A for calls whose Caller ID is a phone number purchased directly from CoreDial.
- Sip trunks that can set passthrough/custom caller id/forwarded calls = B
