

ROBOCALL MITIGATION PROGRAM

Introduction

This Robocall Mitigation Program outlines the compliance practices of Cornfield Voice, LLC ("Cornfield"), with regards to its efforts to reduce and eliminate unlawful robocalls traversing its network. This program is implemented throughout the organization in the form of policies and practices as necessary to ensure compliance.

Business Name and Primary Address

Cornfield Voice, LLC
4422 N Ravenswood, #55
Chicago, IL 60640

No other business names are used by Cornfield. No other business names have been used in the past by Cornfield.

OCN

Cornfield has has been issued the OCN 625L.

Service Provider Type

Cornfield is a domestic entity that operates as a Voice Service Provider and an Intermediate Provider. Cornfield is not a foreign voice service provider.

Robocall Mitigation

All of the calls Cornfield originates on its network are subject to this robocall mitigation program. Cornfield has had no prior certification removed by Commission action and has not been prohibited from filing in the Robocall Mitigation Database by the Commission.

During the prior two years, Cornfield (nor any entity for which Cornfield shares common ownership, management, directors, or control) has not been the subject of a formal Commission, law enforcement, or regulatory agency action or investigation with accompanying findings of actual or suspected wrongdoing due to the filing entity transmitting, encouraging, assisting, or otherwise facilitating illegal robocalls or spoofing, or a deficient Robocall Mitigation Database certification or mitigation program description.

Program Details

Cornfield's Robocall Mitigation Program begins with its employee training. All employees are trained on the basics of robocalls, on Cornfield's Mitigation Program, and on Cornfield's Know Your Customer (KYC) standards. Within the lifecycle of a customer, Cornfield repeatedly performs KYC applicable to the phase of lifecycle. Cornfield reviews prospective customers for red flags. It then reviews customers corporate structure and attempts to confirm it is working with a given, known entity. It reviews customer use cases and identifies appropriate risk management for the customer. When appropriate, it reviews Robocall Mitigation Programs. FCC records are reviewed to identify possible past compliance history. Throughout a customer's lifecycle, changes such as traffic patterns, corporate names, or regulatory action often also triggers a re-review of a customer's risk profile.

Beyond KYC, Cornfield monitors customer traffic with proprietary algorithms, reviewing against known bad traffic patterns and behaviors. In addition to internal signs, any complaints or enforcement actions trigger immediate review.

Cornfield also compares calls to block lists, including its own lists and Do Not Originate lists. It does not accept unsigned calls for transit, and validates all calls originating from, transiting, or terminating to its network.

In so much as Cornfield is doing business with another service provider, it specifically requires and reviews:

- The legitimacy of the customer entity
- The customer's US address
- Customer's RMD filing
- Customer's 499 filing ID
- Customer website and email address associated with the entity name
- STIR/SHAKEN deployment

Know Your Customer

Cornfield requires its customers to provide sufficient information to determine their identity, relative to the risk they pose to the network. This includes reviewing and verifying, to the best of Cornfield's ability, the corporate entity information, the FCC registration number, 499 filer, and Robocall Mitigation Database filing. Cornfield only accepts traffic from service provider

customers who have current Robocall Mitigation Database filings. Cornfield verifies the provider has affirmatively submitted the filing, and that filing has not been de-listed pursuant to an enforcement action.

Traceback Handling

Cornfield will respond to all traceback requests from the Commission, law enforcement, and the Industry Traceback Consortium (“ITG”) within 24 hours and will cooperate with such entities in investigating and stopping any illegal robocallers that attempt to use Cornfield’s network and services to originate, carry or process calls.

The person responsible for addressing robocall mitigation-related issues, and the primary contact for Tracebacks is:

Justin Newman, Manager, 4422 N Ravenswood Ave., #55, Chicago, IL 60640.
rmd-traceback@cornfieldvoice.com. (312) 748-0375.

Any use of this contact information for purposes other than by regulatory bodies or for robocall mitigation is prohibited.

STIR/SHAKEN Framework

Cornfield has fully implemented the STIR/SHAKEN authentication framework across its entire network and all calls it originates will be compliant with § 64.6301(a)(1) and (2).
