

Robocall Mitigation Program – ARATIS SOLUTIONS LLC

Aratis Solutions LLC

10310 Marble Meadow Ct, Cypress TX, 77433

FRN: 0037083029

Contact: Ryan P. Trahan, Managing Director, RyanTrahan@aratissolutions.com

STIR/SHAKEN Implementation Exemption

ARATIS SOLUTIONS LLC is a reseller of SIP trunking services without control over network infrastructure, exempt from STIR/SHAKEN implementation per 47 CFR 64.6305(d)(2)(i). All voice calls are routed through our upstream provider, Telnyx, which implements STIR/SHAKEN authentication using their Service Provider Code (SPC) token and certificate.

Robocall Mitigation Measures

ARATIS SOLUTIONS LLC employs the following measures to mitigate illegal robocalls:

1. Upstream Provider Compliance: We configure client PBX systems (e.g., 3CX) to use Telnyx SIP trunks, which implement STIR/SHAKEN authentication for all calls, ensuring verified caller identity.
2. Caller ID Verification: We enforce +E.164 number formatting in PBX configurations to prevent spoofing and ensure accurate caller ID presentation.
3. Client Consent Policies: We require clients to obtain consent for outbound calling campaigns, verified during PBX setup and monitored for compliance.
4. 10DLC SMS Compliance: For our client using SMS, we maintain a registered 10DLC campaign with Telnyx, adhering to The Campaign Registry (TCR) standards for lawful messaging.
5. Traffic Monitoring: We monitor client call patterns for suspicious activity (e.g., high-volume outbound calls) and investigate anomalies to prevent robocall abuse.
6. Traceback Cooperation: We commit to cooperating fully with FCC and Industry Traceback Group (ITG) requests, providing client call data within 24 hours when required.
7. Regular Audits: We conduct quarterly audits of PBX configurations to ensure compliance with FCC regulations and Telnyx's SIP trunk requirements.

Business Structure

Principals: Ryan P. Trahan, Managing Director (100% ownership).

Affiliates, Subsidiaries, Parent Companies: None.

Commitment to Compliance

ARATIS SOLUTIONS LLC is dedicated to preventing illegal robocalls and complies with all FCC regulations. We will update this mitigation program as needed to reflect changes in our operations or FCC requirements and maintain active cooperation with enforcement efforts.
