Address: 30 N Gould St Ste R, Sheridan, WY 82801

Phone: +1 (307) 263 9706

Contact: Paul Bucemi

Email: paul@unicalls.live

STIR/SHAKEN Exemption Justification

SIP Universe LLC is exempt from the STIR/SHAKEN implementation requirement pursuant to 47 CFR § 64.6304(g), as it does not obtain telephone numbers directly from the North American Numbering Plan Administrator (NANPA) or the Pooling Administrator and does not have the capability to send calls directly to the PSTN. All call traffic is handed off to upstream carriers (e.g., Flowroute) that are responsible for STIR/SHAKEN authentication.

Robocall Mitigation Program Description

SIP Universe LLC does not currently implement STIR/SHAKEN. However, the company has adopted a robocall mitigation program that includes the following measures:

- Vetting all customers prior to service activation
- Blocking of high-risk destinations by default
- Continuous monitoring of call patterns and volumes to detect suspicious activity
- Logging and responding to robocall-related complaints
- Requiring end users to agree to terms prohibiting the use of service for illegal robocalls

SIP Universe LLC is committed to preventing the origination of unlawful robocalls and will actively monitor and enforce its policies to ensure compliance.
