

Robocall Mitigation Program Description

BESM SOLUTIONS UNITED

1. Certification of No STIR/SHAKEN Implementation

We certify that [Your Company Name] does not have the technical capability to implement STIR/SHAKEN on our network at this time as we are a small VoIP provider relying on upstream carriers for call termination and do not have our own SS7 interconnections.

2. Robocall Mitigation Program Compliance (47 CFR § 64.6305(a))

BESM SOLUTIONS UNITED has implemented a robocall mitigation program consistent with FCC requirements, including:

- Blocking known illegal robocalls based on reasonable analytics and industry best practices.
- Responding fully to traceback requests from the Commission, law enforcement, and industry traceback consortium within 24 hours.
- Cooperating with law enforcement and regulators to investigate and mitigate illegal robocall traffic.
- Monitoring traffic patterns and customer behavior for potential robocall activity and taking action when appropriate.

3. Commitment to Future Compliance

We will implement STIR/SHAKEN when technically and financially feasible and will continue to comply with the robocall mitigation requirements until we are able to implement STIR/SHAKEN.
