

Robocall Mitigation Plan

Provider Name: Teknollejists Inc

499 Filer ID:

FRN: 0037274370

Date: 7-21-2025

1. Provider Role:

Teknollejists Inc is a VoIP reseller and does **not originate calls** onto the PSTN. All outbound calls are routed through our upstream interconnected VoIP providers or wholesale carriers who are STIR/SHAKEN-compliant and listed in the Robocall Mitigation Database.

2. Mitigation Strategy:

- We do not operate or manage our own switching equipment that inserts calls onto the PSTN.
- We only contract with vetted upstream carriers who are registered with the Robocall Mitigation Database and fully STIR/SHAKEN compliant.
- We do not allow anonymous or third-party access to our services.
- We perform customer due diligence before activation, including:
 - Business verification (e.g., EIN, corporate records)
 - Contact identity checks
 - Assessment of call pattern types
- We prohibit illegal robocalls in our Terms of Service.

3. Compliance Measures:

- We monitor for traffic anomalies and reports of illegal robocalls.
- We maintain logs and billing data for traceback cooperation.
- We act promptly on notifications from USTelecom's Industry Traceback Group (ITG) or the FCC regarding suspect traffic.

4. Certification:

Teknollejists Inc certifies that this Robocall Mitigation Plan is truthful, accurate, and reflects current operations as required by FCC 21-122.
