- Address: 880 Barble Ave, Frisco, TX 75036
- Contact: Mauricio Silva Cruz, CEO

STIR/SHAKEN Status

Fully implemented via upstream provider (Twilio).

Call Originating Role

Martech Dynamics, LLC originates outbound calls through AI-driven platforms on behalf of business clients who provide verified, consent- based contact lists.

Robocall Mitigation Practices

Consent-Based Calling: All numbers called originate from clients who confirm end-user consent via opt-in web forms.

Retry Logic: Outbound calling automation limits retries to 2 attempts per day per number; over a maximum 7-day sequence.

Phone Number Validation: In progress. A real-time validation system is being implemented to filter typos and invalid entries.

Short Duration/SIP Decline Management: Calls that trigger 603/608 SIP codes or last under 6 seconds are flagged and removed from retry flows.

Do Not Call List Filtering: Implementation roadmap in place to integrate national/state DNC list filtering by 03 2025(1/4)

Caller Identity: Scripts clearly identify the business name and offer opt-out instructions where required.

Monitoring: Metrics are tracked daily and reviewed for anomalies: flagged numbers are rotated or removed.
