

Robocall Mitigation

At Veloquix, our services are focused primarily on inbound communications with our customers. We provide prebuilt services such as a call answering service, as well as a platform that allows them to build their own system for communicating with users.

Within our current system, outbound calls are limited to calling our customers and for our customers to return received calls. There is no escaping that box, and thus there is no way for our customers to improperly use our platform.

We will offer outbound call options eventually. I attest that we will conduct regular audits and implement the reporting infrastructure necessary to detect and stop any use of our system for illegal robocalls.

We assert we will respond within 24 hours to any traceback requests from the Commission, law enforcement or the industry traceback consortium. We will cooperate with any investigations in regards to robocallers attempting to use our systems.

We attest that we do not implement STIR/SHAKEN as we do not have control over the network infrastructure necessary to implement STIR/SHAKEN; we rely entirely on vendors such as Telnix to act as the originating service provider.

We have not operated under any other business name. We have never been the subject of any investigation, robocall or otherwise.

I declare (or certify, verify, or state) under penalty of perjury that the foregoing is true and correct. Executed on July 31th, 2025.

A handwritten signature in black ink, appearing to read 'M Duffey', with a long, sweeping horizontal line extending from the end of the signature.

Michael Duffey
