

Company Name: GoECE
FCC registration (FRN): 0037365418
Service provided: VOIP Service Provider

1- Overview

GoECE is committed to preventing the origination and transmission of illegal robocalls on our network. These efforts are designed to ensure our compliance with FCC rules and maintain the integrity of our voice services.

2- Specific Mitigation Measures

To reduce the risk of unlawful robocalls, we have implemented the following mitigation strategies:

- Customer Verification: All customers are required to undergo identity verification, provide business credentials, and complete a traffic use case questionnaire.
- Outbound Traffic Monitoring: Call Blocking: We block calls with malformed, unassigned, or spoofed caller IDs at the network level.
- Any customer found to be originating or facilitating unlawful robocalls is immediately investigated, and service is suspended.
- For IVR users we only allow Caller ID authentication. Others are blocked.

3- Contact for Robocall Issues
