Robocall Mitigation Practices

- **Practices for Monitoring Call Traffic:**
The company continuously monitors inbound call traffic to identify suspicious patterns indicative of illegal robocalls. Network analytics and call pattern recognition tools are utilized to flag anomalies.
 - **Know Your Customer (KYC) / Vetting Process:**
All customers undergo a thorough vetting process prior to service activation. This includes validating business registration, contact details, and service intent. High-risk customers may be subject to enhanced scrutiny or denied service.
 - **Actions Taken to Block or Investigate Illegal Robocalls:**
If suspected illegal robocalls are detected, the company immediately investigates the source, suspends service if necessary, and cooperates with relevant authorities. Call blocking mechanisms are in place to prevent known illegal robocall traffic.
-

Traceback Cooperation

The company responds promptly to traceback requests from the Industry Traceback Group (ITG) and cooperates fully in identifying the source of illegal robocalls.
