

- Software introduced to monitor outbound voice traffic in real-time to prevent the origination of illegal robocalls.
- The software provides detailed reporting identifying suspected illegal robocalls and alerts CoreDial if CoreDial originates any calls where the calling number is:
 - Invalid
 - Unallocated
- CoreDial will immediately investigate any identified calls to determine if the caller was attempting to originate unlawful robocalls. If we determine that the caller was attempting to originate unlawful robocalls, then we either warn them to stop or terminate their service as appropriate.
