

Robocall Mitigation Program Description

Filer Name: Addres Bilgi Teknolojiler Ltd Sti

FRN: 0037739273

Filing Type: Non-Gateway Intermediate Provider

Date: 13/12/2025

1. Company Description

The filer, **Addres Bilgi Teknolojiler Ltd Sti**, is a foreign entity operating solely as a non-gateway intermediate voice service provider. The filer does not originate calls, does not terminate calls to end users, and does not function as a gateway provider for calls entering the United States Public Switched Telephone Network (PSTN). The filer does not assign, manage, or utilize North American Numbering Plan (NANP) resources.

2. STIR/SHAKEN Applicability

Pursuant to **47 CFR § 64.6304(e)**, the STIR/SHAKEN authentication framework applies only to voice service providers that originate, terminate, or act as gateway providers for calls entering the U.S. PSTN. As the filer performs none of these functions, the filer is exempt from implementing the STIR/SHAKEN authentication framework.

3. Robocall Mitigation Measures

The filer maintains a robocall mitigation program consistent with **47 CFR § 64.6305(c)**. The filer implements reasonable measures designed to prevent the transmission of illegal robocall traffic, including monitoring traffic patterns, cooperating with upstream and downstream providers to address suspicious activity, and taking appropriate action when potentially unlawful traffic is identified.

4. Traceback Cooperation

The filer commits to responding fully and within **24 hours** to all traceback requests from the Federal Communications Commission, law enforcement agencies, and the industry traceback consortium. The filer cooperates with such entities in investigating and stopping illegal robocall activity that may transit its network.

5. Certification

I declare under penalty of perjury that the foregoing is true and correct.
