

Robocall Mitigation Plan

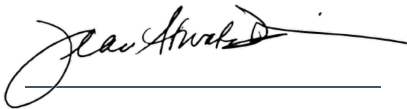

The following policies apply to all customers and/or prospective customers of BizTech Associates and comprise our Robocall Mitigation Plan to avoid originating illegal robocall traffic from our network:

1. CONTRACT REQUIREMENT: Our agreements clearly prohibit passing illegal robocalls through any of our switches or networks and define precise requirements for ASR, LCD and other traffic statistics. Customers who violate these rules are subject to immediate termination without notification. If BizTechAssociates believes illegal traffic has been passed through its network, the customer sending such traffic forfeits confidentiality and all data will be shared with industry partners and law enforcement as required by regulatory bodies.

2. CUSTOMER DISCLOSURES AND CONFIRMATION: All customers are required to disclose certain information about their business such as physical location, contact personnel, state/country of incorporation or business formation, federal tax I.D. or non-USA government I.D. They must also disclose the practices and nature of their business. We endeavor to know the precise type of traffic which originates from each customer's switch including the type of customers they acquire and exact type of services they provide. BizTechAssociates investigates each Customer's claims to verify accuracy before accepting them as a customer.

3. MONITORING AND TRACEBACK: BizTechAssociates monitors its system diligently and will investigate any suspicious traffic. In the event BizTechAssociates receives a Traceback request for an illegal robocall, we act on it immediately, request a specific and detailed explanation from our customer(s) and insist on immediate corrective action. We timely respond to all Traceback request from authorities. If corrective action is not timely provided by our customer, BizTechAssociates takes whatever action is necessary to prevent recurrence of the event(s).

4. LAW ENFORCEMENT COOPERATION: BizTechAssociates cooperates fully with investigative authorities, industry traceback groups, the FCC and the official consortium designated to lead private traceback efforts.
