

Robocall Mitigation Plan – CallSipper LLC

Company Legal Name: CallSipper LLC

Business Address: 800 N King St Ste 304 PMB 1118, Wilmington, DE 19801, USA

EIN: 33-4555497

Responsible Party: Jacob Eckstein

Role: Managing Member / Compliance Contact

Email: jake@callsipper.com

Service Description

CallSipper LLC provides wholesale voice and call center hosting services to verified business and enterprise customers. Customers may be registered internationally and may place outbound calls to international destinations, including the United States. CallSipper does not provide consumer-facing services and does not engage in unsolicited consumer robocalling.

Network Architecture

CallSipper acts as a hosting and orchestration platform. CallSipper does not directly provide VoIP termination. Termination and STIR/SHAKEN signing are handled by upstream providers. CallSipper utilizes external carriers and platforms while maintaining control and visibility over customer configurations and traffic behavior.

Customer Vetting & Transparency

All customers undergo business verification prior to activation. Intended use cases are reviewed, and illegal robocalling, spoofing, and fraudulent traffic are strictly prohibited. Anonymous or unverifiable customers are not accepted.

Monitoring & Enforcement

CallSipper monitors call activity through its hosting systems and upstream reports. Call records and signaling data are available for review. In the event of complaints, abnormal traffic patterns, or regulatory inquiries, CallSipper cooperates fully with upstream providers and authorities. Services may be suspended or terminated immediately in cases of suspected abuse.

STIR/SHAKEN

CallSipper relies on upstream voice service providers for STIR/SHAKEN call authentication and signing. CallSipper does not independently originate or sign calls at this time.

Compliance Commitment

CallSipper LLC commits to complying with all applicable FCC rules regarding robocall mitigation and

illegal traffic prevention. This plan will be reviewed and updated as CallSipper's traffic profile or regulatory obligations evolve.
