

All Tech'D Out, LLC

P.O Box 254

Neffs, Pa 18065

To Whom It may Concern,

All Tech'D Out, LLC is a small, private telecommunications provider that delivers business telephone and VoIP systems to enterprise customers. As part of its Robocall Mitigation Program, the company uses STIR/SHAKEN caller ID authentication on IP-based traffic, combined with strict customer vetting, traffic monitoring, and abuse-response procedures, to prevent the origination and transmission of illegal robocalls over its network. The program includes Know Your Customer (KYC) onboarding, verification of intended use cases, ongoing review of call patterns for suspicious or high-volume activity, and prompt blocking or restriction of traffic associated with suspected illegal robocalls, while fully cooperating with traceback requests, regulators, and law enforcement.

Sincerely,

Jason Gutierrez
