

## **Robocall Mitigation Program Description**

**Company Name:** Hyperion Information Technology, LLC

**Date:** 1/23/2026

---

### **1. Company Overview**

Hyperion Information Technology, LLC (“Hyperion”) operates as a VoIP reseller providing voice services to business customers. Hyperion does not operate its own telecommunications network or STIR/SHAKEN authentication infrastructure and relies on its upstream voice service provider, SkySwitch, for call origination, termination, and STIR/SHAKEN implementation.

Hyperion does not function as a gateway provider and does not directly originate PSTN traffic independent of its upstream carrier.

---

### **2. STIR/SHAKEN Reliance**

Pursuant to 47 CFR § 64.6304 and § 64.6305, Hyperion relies on its upstream voice service provider, SkySwitch, for STIR/SHAKEN authentication and call handling. All calls transmitted by Hyperion are subject to SkySwitch’s STIR/SHAKEN framework and network-level robocall mitigation measures.

---

### **3. Robocall Mitigation Measures**

To mitigate illegal robocall activity, Hyperion implements the following measures:

- Reliance on upstream carrier (SkySwitch) STIR/SHAKEN implementation and call authentication.
  - Monitoring of customer usage patterns for abnormal or suspicious calling behavior.
  - Investigation of complaints related to illegal robocalls or spoofing.
  - Suspension or termination of customers found to be engaged in unlawful calling activity.
  - Coordination with SkySwitch to address suspected robocall threats.
-

#### **4. Response to Traceback Requests**

Hyperion commits to cooperating with traceback requests from the FCC, law enforcement agencies, and industry traceback organizations by coordinating with its upstream carrier to investigate and address any identified illegal robocall activity.

---

#### **5. Ongoing Compliance**

Hyperion reviews its robocall mitigation practices periodically and updates its procedures as necessary to remain consistent with FCC requirements.

---

#### **6. Certification**

Hyperion certifies that the above robocall mitigation program description is accurate to the best of its knowledge and reflects its role as a VoIP reseller relying on its upstream carrier for network-level call authentication and mitigation.
