Robocall Mitigation Program

We rely on software provided by PayG LLC dba Coredial to monitor our outbound voice traffic in Realtime to prevent the origination of illegal robocalls.

Combining behavioral analytics, caller authentication and verification, our solution features:

- Fraud Detection: Detection of high-volume robocalling, spoofing and spam call activity.
- Subscriber Notification: Caller ID Name override to warn subscribers of suspicious calls.
- Call Blocking Support: Accurate identification enabling you to block fraudulent phone calls as per the TRACED Act (2019)
- Business Number Verification: Register legitimate business numbers to prevent unintentional call blocking.
- Caller ID Name Service: Easy integration of Caller ID name lookup service, including robocall mitigation with override to include original caller ID even when call is determined fraudulent.
- Do Not Call Registry: We comply with the FTC's rules for the Do Not Call Registry.

I, Tyson Albright, submit this certification on behalf of Tyson Communications LLC, I certify, under penalty of perjury, Pursuant to section 1.16 of the FCC's rules, that the information and statements contained herein are true and correct to the best of my knowledge and belief.
