

ROBOCALL MITIGATION PLAN

Entity Name: S&M stuff n such llc

FCC Registration Number (FRN): 0037966983

Date: February 2, 2026

S&M stuff n such llc (the "Company") provides this Robocall Mitigation Plan in accordance with the rules of the Federal Communications Commission (FCC). The Company is an end-user enterprise customer utilizing SIP trunking services for internal business operations. The Company does not function as a commercial telecommunications carrier, a reseller of voice services, or a provider of telemarketing services.

The Company has not implemented STIR/SHAKEN as it does not control the underlying network infrastructure required to sign calls with a digital certificate. All outbound calls are delivered to our upstream provider, who is responsible for call authentication and signaling.

Despite being an end-user, the Company takes the following steps to ensure no illegal robocalls originate from our systems:

Access Control: All VoIP hardware and Private Branch Exchange (PBX) systems are secured behind a firewall with IP-based Access Control Lists (ACLs). Credentials for SIP trunks are rotated regularly and restricted to authorized personnel.

Know Your User (KYU): As an enterprise, "customers" of our voice service are limited to verified employees. We do not allow third-party access to our trunking resources.

Traffic Monitoring: The Company monitors outbound call logs for anomalies. Any patterns suggesting high-volume automated dialing or unauthorized use will result in the immediate suspension of the affected extension.

S&M stuff n such llc commits to fully cooperating with the Industry Traceback Group (ITG) and any federal or state law enforcement agencies. We certify that we will respond to all traceback requests within 24 hours of receipt.

I hereby certify that the information provided in this Robocall Mitigation Plan is true and correct to the best of my knowledge. S&M stuff n such llc is committed to maintaining the integrity of the voice network and preventing the origination of illegal robocalls.
