Orbis provides VoIP services as a reseller. Orbis does not operate its own network infrastructure and therefore does not directly implement the STIR/SHAKEN framework. We utilize CoreDial, LLC exclusively for VoIP services. All calls that Orbis originates onto the PSTN are delivered through our provider CoreDial, LLC, who perform STIR/SHAKEN signing on our behalf.

Per CoreDial, LLC's Robocall Mitigation Compliance with TRACED Act plan filed on September 16, 2025, they have fully implemented STIR/SHAKEN. All calls that that CoreDial originates are compliant with Sections 64.6301(a)(1) and (2) of the Commission's rules.

Orbis certifies that:

- All calls it originates are subject to a robocall mitigation program.
- Orbis is not subject to any prohibition on filing and has not had any prior certification removed.
- Orbis will cooperate fully with traceback requests and law enforcement inquiries.

As detailed below, Orbis has taken specific reasonable steps to avoid, the origination, carrying, or processing of illegal robocall traffic. All voice traffic that originates on our network is subject to the below Robocall Mitigation Program.

STIR/SHAKEN Through Upstream Provider

- All outbound calls are delivered through our provider CoreDial, LLC, who perform STIR/SHAKEN signing on our behalf
- Coredial has fully implemented STIR/SHAKEN and maintains a comprehensive Robocall Mitigation Plan
- Orbis will conduct periodic reviews to ensure CoreDial remains compliant and will partner only with upstream carriers who are fully STIR/SHAKEN compliant.

Know Your Customer (KYC) Procedures

Orbis maintains a structured KYC process that includes:

- Verification of business identity and legal name
- Confirmation of EIN and business registration
- Verification of physical business presence
- Validation of intended calling use cases

Acceptable Use Enforcement

- All customers must comply with an Acceptable Use Policy.
- Customer agreements explicitly prohibit the origination of illegal robocalls.
- Violations may result in suspension or termination of service.

Traffic Monitoring

- Orbis continuously monitors calling patterns, volume, and behavioral indicators for signs of unlawful calling activity.
- Insights and reporting provided by CoreDial are used to identify and investigate suspicious traffic.

Traceback Cooperation

- Orbis commits to responding to Industry Traceback Group (ITG), FCC, or law enforcement traceback requests within **24 hours**.
- Orbis will fully cooperate with all traceback investigations to identify call sources and mitigate unlawful robocalling.

Ongoing Review and Updates

Orbis will review and update this Robocall Mitigation Program as necessary to address evolving regulatory requirements, industry guidance, and emerging threats. Orbis remains committed to full compliance with FCC rules and to protecting consumers from illegal robocalls.
