

Mars Tech Solutions is a small IT company based out of Edison, NJ. We are taking voip services from ioTran, our voip service provider. We are asked to do the following:

What is Required

Under an existing FCC ruling, **every VoIP provider or reseller involved in the voice call delivery chain must be registered in the FCC Robocall Mitigation Database (RMD)**. This requirement applies to all VoIP providers industry-wide, including ioTRAN, Talking Platforms, and its customers.

We have only about 10 telephone lines that we use to communicate with our clients. We don't resell these services or make bulk/robo calls.

Deadline

February 28, 2026

Abdul Shareef,

President, Mars Tech Solutions LLC,

732-406-3919
