

All in One Telecom, Inc

RMD Status: Active

FCC FRN: 0037989134

Responsible Office: Robin Scott CEO 813-486-7752

Robocall Mitigation Plan (RMP) for **All in One Telecom, Inc.** based on current FCC rules (47 CFR 64.6305) and industry's best practices.

Robocall Mitigation Plan: All in One Telecom, Inc.

1. STIR/SHAKEN Implementation Status

- **Statement:** All in one Telecom, Inc. certifies it has implemented STIR/Shaken protocols to authenticate caller ID for all IP-based traffic.

2. Reasonable Steps to Avoid Illegal Robocalls

All in one Telecom, Inc. employs the following "reasonable steps" to prevent originating illegal traffic:

- **Know Your Customer (KYC):** Verifying the identity of new customers through physical addresses, tax IDs, and business formation documents.

Traffic Monitoring: Using real-time software to monitor outbound traffic for patterns indicative of robocalling (e.g., high volume, short duration, high burst rates).

Software introduced to monitor outbound voice traffic in real-time to prevent the origination of illegal robocalls.

- The software provides detailed reporting identifying suspected illegal robocalls and alerts Provider if it originates any calls where the calling number is:
 - Invalid
 - Unallocated
- All in One will immediately investigate any identified calls to determine if the caller was attempting to originate unlawful robocalls. If we determine that the caller was attempting to originate unlawful robocalls, we can terminate their service as per contract.
-
- **DNO List Enforcement:** Mandatory blocking of calls using a **Do Not Originate (DNO)** list, including invalid, unallocated, and unused numbers.

- **Contractual Prohibitions:** Service agreements explicitly prohibit using the network for illegal robocalling and grant the company the right to terminate service for violations.

3. Commitment to Industry Traceback

- **Statement:** All in one Telecom, Inc. commits to responding to all traceback requests from the FCC, law enforcement, and the registered Industry Traceback Group (ITG) within **24 hours**.

4. Annual Recertification and Updates

- **Annual Requirement:** The company will complete its mandatory **annual recertification** in the Robocall Mitigation Database (RMD) by the **March 1** deadline of each year.
- **10-Day Rule:** The company will update its RMD filing within **10 business days** of any material change to its contact information or mitigation practices to avoid forfeiture.
