

Robocall Mitigation Plan
TAG Mobility, LLC

Other DBA Names: TAG Mobile

TAG Mobility, LLC (“Tag Mobile”) submits the following Robocall Mitigation Plan in compliance with 47 CFR § 64.6305 (d)(ii)-(iii). This plan is applicable to TAG Mobile and the following affiliates: AirVoice, Wireless, LLC; Cintex Wireless, LLC; and TAG Mobile Bankruptcy Sale Entity, LLC.

Reasonable Steps to Prevent New and Existing Customers from Originating Illegal Calls:

By agreeing to TAG’s Terms & Conditions, TAG Mobile subscribers agree not to use TAG’s services for “spamming” or engaging in other abusive or unsolicited communications. The Terms & Conditions make clear that TAG’s voice service is intended for voice calling for personal use only and may not be used for any other type of activity. TAG Mobile reserves the right to terminate a subscriber’s account if the subscriber uses the service in violation of the Terms and Conditions.

When TAG Mobile is notified or aware of spamming or otherwise abusive or unsolicited communications, TAG Mobile conducts a thorough investigation of the subscribers’ practices and usage. Subscribers determined to be in violation are given written notice which includes the reasoning for deactivation and promptly deactivated.

Description of Analytics to Block Illegal Traffic:

As an MVNO, TAG Mobile has agreements with AT&T and PWG Network Solutions to act as TAG’s underlying carriers which facilitate identifying and blocking illegal traffic.

Know Your Customer Practices:

Because TAG Mobile is a Lifeline provider, all of TAG’s subscribers sign up for service using the National Verifier or NLAD. That enrollment process collects substantial personal information to verify the identity of TAG subscribers.

TAG Mobile registers the enrollment and transfer of a subscriber in NLAD by providing the required notice of a transfer to NLAD using the NLAD API or other applicable NLAD process which distinguishes and identifies TAG Mobile subscribers.

Know Your Upstream Provider Practices:

TAG Mobile obtains all of its voice services, including telephone numbers, directly or indirectly (through an aggregator) from AT&T and T-Mobile/PWG Network Solutions (collectively “T-Mobile”). AT&T and T-Mobile have filed their own STIR/SHAKEN certifications.

Commitment to Respond to Traceback Requests:

TAG Mobile is willing and able to respond fully and within 24 hours to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping any illegal robocallers that use its service to originate calls.

This Robocall Mitigation Plan describes the specific measures that TAG Mobile has implemented to as of February 11, 2026. TAG Mobile continually evaluates the efficacy of its measures to combat bad actors and takes appropriate steps to improve these measures when needed.
