

Robocall Mitigation Program Description

Tolleson Inc.

Tolleson Inc. utilizes a third-party voice service provider for all business telecommunications services. Tolleson Inc. does not operate its own telecommunications network and does not originate robocalls or automated bulk calling traffic. All outbound calls are made for legitimate business purposes by employees in the normal course of operations.

Tolleson Inc. relies on its upstream voice service provider to implement STIR/SHAKEN call authentication and robocall mitigation measures. The company complies with all applicable acceptable use policies of its voice service provider and does not knowingly transmit illegal robocall traffic or spoofed caller identification information.

Tolleson Inc. maintains internal controls to ensure that telephone services are used only for legitimate business communications and will cooperate with any lawful traceback or investigation requests related to suspected illegal robocall activity.
