

Sellwood Telephone
Robocall Mitigation Program Description

Sellwood Telephone is an amateur club made up of families and individuals in the Sellwood-Moreland neighborhood of Portland, Oregon. Club members are interested in landline style telephone service for their personal use.

This is not a commercial venture. VoIP services for our club members are provided at cost.

All members are personally known to the Operator. Members mostly call each other, but occasionally call outside friends and family members.

All DID numbers are provided by Voip.ms, and calls are routed exclusively through Voip.ms servers.

No robocalls are allowed.
