ROBOCALL MITIGATION PLAN

Filer: TTT Enterprises LLC

Principal: Tim Walker, Owner

Date: February 18, 2026

1. STIR/SHAKEN Certification & Exemption

TTT Enterprises LLC ("TTT") is a non-facilities-based reseller of VoIP services, primarily serving our Remote IT Support client base. TTT does not own, operate, or control the physical network infrastructure or softswitch hardware required to implement the STIR/SHAKEN authentication framework directly.

Pursuant to **47 CFR § 64.6304(b)** and **(d)**, TTT is exempt from direct implementation as it is technically incapable of obtaining an SPC token. All call authentication and signing are performed by TTT's upstream provider, **Talking Platforms/ioTRAN**, a STIR/SHAKEN-compliant provider registered in the Robocall Mitigation Database.

2. Know Your Customer (KYC) & Vetting

As a managed IT provider, TTT has a pre-existing professional relationship with its clients. Our vetting process includes:

- **Identity Verification:** All clients must execute a "Letter of Authorization" (LOA) and provide a current utility or phone bill.
- **Corporate Verification:** TTT verifies the legal standing of every business entity via the State Corporation Division website.
- **Contractual Enforcement:** Our service agreement warrants that all customer information is accurate and provides TTT the right to perform credit investigations and bank reference checks.

3. Monitoring and Mitigation

TTT maintains a zero-tolerance policy for illegal robocalling.

- **Traffic Oversight:** In coordination with **ioTRAN**, traffic is monitored for suspicious patterns (e.g., high-volume, short-duration calls).

- **Immediate Termination:** Per our agreement, TTT reserves the right to terminate services immediately if a customer engages in fraudulent activity or experiences adverse credit performance.
- **DNO Compliance:** TTT utilizes upstream "Do Not Originate" (DNO) lists to prevent the spoofing of protected numbers.

4. 24-Hour Traceback Commitment

TTT Enterprises LLC fully complies with all traceback requests from the **Industry Traceback Group (ITG)**, the FCC, and law enforcement. TTT commits to identifying the source of any traffic and responding to official inquiries within **24 hours**.
