

Robocall Mitigation Plan

Company Name: ClearSIP Inc. dba CE Voice **FRN:** 0024220568 **Date:** February 2026

1. Introduction & Implementation Status

ClearSIP Inc. dba CE Voice is a non-facilities-based interconnected VoIP reseller. We do not own or operate the underlying network infrastructure or switching equipment used to originate calls. As such, we lack the technical control necessary to implement the STIR/SHAKEN authentication framework directly.

Additionally, because we do not possess an Operating Company Number (OCN), we are ineligible to obtain a Service Provider Code (SPC) token from the STI-PA. We therefore claim an ongoing extension from the implementation requirements of **47 CFR § 64.6301** pursuant to **47 CFR § 64.6304**.

2. Know Your Customer (KYC) Procedures

To prevent the origination of illegal robocalls, ClearSIP Inc. dba CE Voice employs strict "Know Your Customer" protocols as required by **47 CFR § 64.1200(n)(3)**:

- **Identity Verification:** We require all new business customers to provide a valid Employer Identification Number (EIN) or equivalent tax ID, a physical business address, and verifiable contact information. For government clients (cities/counties), we verify their identity using their official government domain (.gov), their IRS-issued EIN, and by confirming their status as a political subdivision through state-maintained public records.
- **Service Usage Review:** We screen new customers for high-volume or "autodialer-like" traffic needs. Any customer requesting high-capacity SIP trunking is subject to additional manual review of their intended use case.
- **Contractual Prohibitions:** Our Terms of Service explicitly prohibit the use of our network for illegal robocalling, spoofing, or any activity that violates the TCPA or

Truth in Caller ID Act. We reserve the right to suspend or terminate service immediately for such violations.

3. Traceback Cooperation (The "24-Hour Rule")

ClearSIP Inc. dba CE Voice fully commits to responding to all traceback requests from the FCC, law enforcement, and the **Industry Traceback Group (ITG)** within **24 hours** of receipt. We have designated a specific internal compliance officer to handle these requests to ensure zero-delay cooperation.

4. Upstream Provider Vetting

We exclusively use wholesale providers Skyswitch/CoreDial that are registered in the FCC Robocall Mitigation Database and are in full compliance with STIR/SHAKEN mandates. We rely on these upstream partners to perform the actual digital signing and authentication of our traffic.

I, Michael Allsup certify under penalty of perjury that I am an officer of ClearSIP Inc. dba CE Voice, that I have the authority to make this certification, and that the foregoing Robocall Mitigation Plan is true and correct to the best of my knowledge.

Signed: Michael Allsup **Title:** CEO **Date:** 02/17/2026
