

Experteers LLC is an interconnected VoIP provider offering white-label unified communications services to business customers.

Experteers relies on its upstream service provider for STIR/SHAKEN call authentication and call signing.

Experteers maintains a written Acceptable Use Policy prohibiting illegal robocalling, spoofing, and fraudulent traffic.

All customers are provisioned only after identity verification and account approval procedures.

Experteers monitors traffic patterns for anomalous call behavior and reserves the right to suspend or terminate services for violations of federal or state telecommunications laws.

Experteers complies with FCC Do-Not-Originate (DNO) blocking requirements through its upstream carrier relationships and internal enforcement procedures.
