

Robocall Mitigation Program Description

The company operates as a small voice service provider utilizing upstream interconnected voice service providers that implement STIR/SHAKEN authentication and robocall mitigation measures. The company does not operate its own authentication infrastructure and relies on upstream providers for call authentication and mitigation functions.

Voice services are used primarily for internal business communications and emergency capability. The company does not conduct telemarketing or high-volume outbound calling.

The company does not knowingly originate illegal robocalls and will cooperate fully with traceback requests from the Federal Communications Commission, law enforcement, and industry traceback consortiums in accordance with 47 CFR § 64.6305.
