

Bit Happens LLC

RoboCall Migration Plan

Bit Happens LLC is an interconnected VoIP provider offering voice, messaging, fax, API, and hosted PBX services to our end users.

1. Stir/Shaken

Bit Happens LLC has complete/full STIR/SHAKEN integration into our IP/Voice Network, we are signing all calls that originate from our network based on A, B, or C attestation.

2. Traceback Group

Bit Happens LLC is a member of the ITG and responds within 24 business hours to any complaint or traceback.

3. KYC (Know Your Customer)

Bit Happens LLC has a strict KYC process in place, every customer is vetted before their account is enabled for outbound calling, messaging, or faxing. Free email domains are automatically blocked from self-sign-on and require extra vetting such as ID verification and KYB verification.

4. KYB (Know Your Business)

Bit Happens LLC has implemented a KYB vetting process, we use a third party service to check EIN, Address, and other business details the customer submits for accuracy.

5. DNO (no not originate)/Caller ID Check

Bit Happens LLC uses the DNO list for the ITG as well as maintains its own internal DNO list of known high-risk or fraud caller IDs. We perform daily cross-references of network traffic against ITG and internal DNO lists. Any suspicious activity is manually flagged for immediate review and mitigation by our compliance team.

6. Account Limitations

Bit Happens LLC has restrictions in place on all accounts that reduce the risk of high-volume robocalling. All accounts have blocked outbound calling, messaging, and faxing until it has passed KYC, accounts have a call per second limitation, a max concurrent call limitation, and an account spend limitation, all these will limit exposure to mass/large amounts of calls as well as disable the account and notify our compliance department of the suspected fraud.

7. Acceptable Use Policy and Master Service Agreement

All customers must adhere to our Acceptable Use Policy (AUP) and Master Service Agreement (MSA), which strictly prohibit illegal activities, fraud, and unauthorized robocalling.

Bit Happens LLC reserves the right to terminate service for any user found to be in violation.
