

V2 TECHNOLOGY LLC does not permit the origination of illegal robocalls or spoofed traffic. The company utilizes upstream STIR/SHAKEN authentication provided by its underlying network partners and enforces internal policies to prevent unlawful use of its services. Robocall mitigation efforts include: - Verification of customer identity prior to service activation - Contractual prohibitions against illegal robocalling, spoofing, and fraudulent activity - Monitoring for abnormal or suspicious calling patterns - Prompt investigation of complaints or traceback notifications - Suspension or termination of customers found to be in violation - Cooperation with industry traceback requests within 24 hours

STIR/SHAKEN call signing is performed by upstream providers on behalf of V2 TECHNOLOGY LLC. The company remains responsible for customer compliance with FCC robocall mitigation requirements.
