

Targa Technologies, LLC
PO Box 4236, Schenectady NY 12304

Targa Technologies LLC is a reseller of Coredial / Skywitch and has no control of the Network, no access to the Servers and does not implement STIR/SHAKEN directly.

Targa Technologies assigns extensions and configures end user phones by utilizing network software, provided by and maintained by Coredial.

Coredial Stir/Shaken Plan obtained through Coredial knowledge base below;

CoreDial's STIR/SHAKEN plan is a compliance framework that authenticates caller ID information for voice-over-IP (VoIP) calls to prevent illegal spoofing and robocalls, adhering to FCC regulations. It involves assigning digital certificates to calls, investigating potential illegal robocalls, and enforcing compliance by warning or terminating services for violators.

CoreDial Knowledge Base +1

Key Details of CoreDial's STIR/SHAKEN Implementation:

- **Purpose:** Ensures caller ID trustworthiness, reducing blocked or labeled spam calls for legitimate businesses.
- **Components:** Includes investigation of suspicious traffic and strict warnings or termination for violators.
- **Compliance:** Aligns with Federal Communications Commission (FCC) mandates under the TRACED Act, which requires voice service providers (VSPs) to sign and verify caller ID information.
- **Attestation Levels:** As part of the broader standards, CoreDial's system supports attestation levels—Full (A), Partial (B), or Gateway (C)—to indicate how well the caller's identity is verified
