Subject: [Fwd.:] Reminder: RMD Recertification Deadline - March 1st, 2026

To: Leandro Campos <leandro.campos@nvoip.com.br>

Dear Leandro,

You're receiving this email because you're registered as a reseller with VoIP.ms. If this was sent in error, please contact us at support@voip.ms. Otherwise, please continue reading.

Just a quick reminder that the Federal Communications Commission's (FCC) annual **Robocall Mitigation Database (RMD) recertification** is coming up.

As a reminder, if you offer voice services in the United States, you are required to be registered in the RMD, and you must complete your **recertification by March 1st, 2026**, to remain compliant.

This is part of the FCC's updated rules aimed at improving the accuracy of the Robocall Mitigation Database and CORES registration system. The goal is simple: ensure provider information stays current and accountable.

What this means for you:

- You must log into the FCC's RMD system and confirm your existing filing.
- Look for the blue button at the top right of the page after logging in.
- Make sure your mitigation details and contact information are accurate.
- Submit your annual recertification before **March 1, 2026**.

If a provider does not recertify on time, the FCC may remove their entry from the database. Downstream carriers are required to block traffic from providers not listed in the RMD, which can directly impact service continuity.

Why this matters for resellers:

If you operate as a reseller, your ability to originate traffic depends on maintaining an active and compliant RMD registration. Any lapse in certification **could result in traffic disruption** until your status is restored.

We strongly recommend reviewing your filing early to avoid last-minute issues.

For full details on the rule changes and compliance requirements, please review the [official Federal Register notice](#).

If you have questions about how this applies to your setup, we encourage you to consult legal counsel to ensure you remain compliant.

Best regards,
VoIP.ms Team
