

ROBOCALL MITIGATION PLAN - WOLFVOIP LLC

Wolfvoip LLC has implemented a strict robocall mitigation program. We utilize VitalPBX with encrypted SIP signaling and only originate traffic from known, authorized extensions. We monitor call patterns for high-volume, short-duration traffic and maintain a strict 'Know Your Customer' (KYC) policy. Our service does not allow unauthenticated broadcast or automated telemarketing traffic. We qualify for the extension of the STIR/SHAKEN implementation deadline for small providers under 47 C.F.R. § 64.6304.
