CG Docket No. 17-97

CERTIFICATION PURSUANT TO 47 C.F.R. 64.6305(d)

1. I, Peter Saharko, Vice President, Regulatory, for Verizon Value, Inc. ("Verizon Value"), submit this certification on behalf of each Verizon affiliate to the extent it operates as a "voice service provider, gateway service provider, and/or non-gateway intermediate provider."
2. Verizon Value has implemented the STIR/SHAKEN authentication framework as indicated in its Robocall Mitigation Database registration.
3. The statements and information contained in this certification are accurate and complete to the best of my knowledge and belief.
4. Pursuant to 47 C.F.R. § 1.16, I certify under penalty of perjury that the foregoing is true and correct.

Peter Saharko
Vice President, Regulatory
Verizon Value, Inc.

APPENDIX A

VERIZON VALUE STATEMENT IN SUPPORT OF ITS 47 C.F.R. 64.6305(b) “VOICE SERVICE PROVIDER” CERTIFICATION AND DESCRIPTION OF ROBOCALL MITIGATION PROGRAM

Under 47 C.F.R. Section 64.6305(b)(1), Verizon Value certifies as to the degree of STIR/SHAKEN implementation for each of its domestic (partial) and foreign (none) voice service providers .

With respect to each subpart of 47 C.F.R. Section 64.6305(d)(2), Verizon Value states:

(i) Identification of the type of extension or extensions the voice service provider received under Section 64.6304, if the voice service provider is not a foreign voice service provider

Verizon Value relies on its underlying network providers to implement STIR/SHAKEN authentication.

(ii) The specific reasonable steps the voice service provider has taken to avoid originating illegal robocall traffic as part of its robocall mitigation program

Verizon Value works closely with its mobile network operator providers on “know your customer” and traffic monitoring processes to mitigate the risk that it may inadvertently process or route illegal robocalls on behalf of its customers. Verizon Value’s terms and conditions prohibit the use of its services for fraudulent or illegal purposes and for spamming or engaging in other abusive messaging or calling. Verizon Value actively monitors its customers’ accounts for such behavior using reporting from its mobile network operators and rapidly terminates accounts that violate these terms of service.

Verizon Value’s robocall mitigation activities are calibrated to address the risk that particular platforms could potentially be used by customers to initiate illegal robocalls. Because the vast majority of Verizon Value’s traffic originates on affiliated networks, Verizon Value’s mobile network operators can integrate real-time analytics into the account monitoring process. Monitoring of Verizon Value accounts includes, but is not limited to, taking daily action based on our mobile network operators’ reporting, which in most cases is automatically generated based on metrics such as call volumes, SIP response codes, answer rates, call duration, honeypot hits, Industry Traceback Group traceback volumes, “neighbor” spoofing calling patterns, calls that trigger crowd-sourced complaints, and other reports of abusive account behavior from our customers, our mobile network operators, and our partners in the financial services industry who share information with us about confirmed fraud. Based on these and other reasonable analytics, we take appropriate action to curb the behavior, including submission of tracebacks, termination of the customer relationship and referrals to law enforcement. And to the extent a Verizon Value customer’s account shows characteristics consistent with illegal robocalling, analysts and attorneys who are experts in the Telephone Consumer Protection Act and other anti-robocalling laws review the account and take action accordingly.

To the extent that we receive information from law enforcement or other sources that a customer is engaged in illegal calling, our policy is to cooperate fully, including by providing the identity of any suspected illegal robocaller pursuant to legal service of process.

(iii) A statement of the voice service provider’s commitment to respond fully and within 24 hours to all traceback requests from the Commission, law enforcement, and the industry traceback consortium,

and to cooperate with such entities in investigating and stopping any illegal robocallers that use its service to originate calls

Verizon Value is committed to respond fully and within 24 hours to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping any illegal robocallers that use its service to originate calls.
