

# SOMOS Technology, Inc. - Robocall Mitigation Plan

Updated March 1, 2026

## 1. Introduction

This document outlines SOMOS Technology, Inc's comprehensive plan to mitigate the impact of illegal robocalls on our network. We are committed to adhering to all applicable regulations and best practices to minimize unwanted calls and protect our customers from fraud and harassment. This plan will be regularly reviewed and updated to ensure its effectiveness in addressing the evolving robocall landscape.

This robocall mitigation plan is for SOMOS Technology, Inc, with a mailing address of  
19425 Soledad Canyon Road Suite 141

Santa Clarita, CA 91351

SOMOS Technology is not a foreign voice service provider.

## 2. STIR/SHAKEN Implementation

SOMOS Technology, Inc is fully compliant with the FCC's STIR/SHAKEN framework for call authentication and routing. We have implemented systems to: Generate and validate digital signatures for originating calls on our network, analyze call attestation data to identify and block calls with invalid or suspicious signatures, route calls with valid signatures with higher priority to enhance call delivery for legitimate callers.

We have implemented a STIR/SHAKEN solution

## 3. Know Your Customer/ Know Your Upstream Providers

3.1 Know Your Customer: SOMOS Technology, Inc has a comprehensive vetting and review process for all new customers. Our clients are generally small businesses.

We verify business name, address, and contact information. In addition, we verify legal structure, federal employer identification number, business description and services offered, authorized representatives and their contact information, and intended use of voice services.

We periodically review customer accounts and usage patterns to identify potential red flags. We investigate complaints related to robocalls originating out side of network.

3.2 Know Your Upstream Providers: We have specific provisions in our contracts with upstream providers that require them to implement robust anti-robocall measures. We require them to mandate their cooperation in investigations of suspected illegal robocall

traffic. If we find an upstream provider is sending suspicious calls, we will terminate service in cases of non-compliance with anti-robocall regulations.

#### 5. Traceback

SOMOS Technology will respond within 24 hours to all traceback investigations initiated by the Federal Communications Commission (FCC), law enforcement, or the registered traceback consortium. We maintain detailed call records that include timestamps, originating and terminating numbers, call duration, and other relevant data. These records are crucial for identifying the source and path of suspected illegal robocalls.
