

Robocall Mitigation Program Description

Company Name: GTNSS INC.

Role: Telecommunications Reseller

GTNSS Inc. is a wholesale Telecommunications reseller providing consulting, sales & support services to business customers. We do not originate voice traffic, operate network or assign telephone numbers to end users instead our voice services are provisioned and delivered by underlying licensed telecommunications carrier. These carriers are responsible for call origination, routing numbering resources, and implementation of STIR/SHAKEN caller ID authentication in compliance with FCC requirements. GTNSS relies on its upstream partners for robocall mitigation and STIR/SHAKEN compliance. The company performs reasonable customer due diligence and will cooperate with underlying providers and appropriate authorities if any suspected illegal robocalling activity is identified.

I certify that the information contained in this Robocall Mitigation Program Description is accurate and GTNSS Inc. complies with applicable robocall mitigation requirements and relies on its upstream service providers for STIR/SHAKEN implementation as described above.
