

Robocall Mitigation Program Description

Company Name: Event Radio Rentals Inc / ERR Mobility

FCC FRN: 0011111846

Contact: Jason M. Sarnoff

Company Description

Event Radio Rentals / ERR Mobility is a communications services provider specializing in two-way radio equipment rentals, sales, and system deployment. The company does not originate voice traffic on the public switched telephone network (PSTN) and does not provide interconnected VoIP services.

Robocall Mitigation Practices

Event Radio Rentals / ERR Mobility does not originate robocalls or mass dialing campaigns. The company's services are limited to land mobile radio (LMR) communications and related infrastructure.

To ensure compliance with FCC regulations and prevent misuse of communications services, the company maintains the following safeguards:

- Customer vetting and verification prior to service provision
 - Use of services strictly limited to lawful communications purposes
 - Monitoring for misuse of communications equipment
 - Immediate termination of service for any suspected unlawful activity
 - Cooperation with law enforcement and regulatory authorities as required
-

STIR/SHAKEN Implementation

Event Radio Rentals / ERR Mobility does not originate IP-based voice traffic requiring STIR/SHAKEN authentication. Therefore, STIR/SHAKEN implementation is not applicable.

Certification

Event Radio Rentals / ERR Mobility certifies that it has implemented appropriate measures to prevent the origination of illegal robocalls and will continue to comply with all applicable FCC regulations.
