Security Systems

Date: March 7, 2026

Company Name: Advanced Security Systems

Subject: Robocall Mitigation Program Description

Our company is a non-facilities-based voice service provider reselling VoIP services. All outbound calls are routed through our upstream provider, VoIP.ms, which performs STIR/SHAKEN authentication and signing.

We verify the identity of all customers prior to service activation and continuously monitor traffic for unusual patterns or excessive call volumes. Any accounts suspected of originating illegal or suspicious calls are promptly investigated and suspended.

We cooperate fully with traceback requests from the FCC, law enforcement, and the industry traceback consortium, taking appropriate actions to stop illegal robocall activity. Our mitigation program ensures compliance with 47 CFR § 64.6305(a) and supports lawful call traffic on the U.S. public network.

Sincerely,

Fuad Maayeh – CEO
