

ROBOCALL MITIGATION PROGRAM DESCRIPTION

Datablaze, LLC

Date: March 19, 2026

Provider Type: Non-Gateway Intermediate Provider

1. Company Overview

Datablaze, LLC is a Non-Gateway Intermediate Provider that carries and transports voice traffic between other providers in the call chain. Datablaze, LLC does not originate calls from end users, does not terminate calls to end users, and does not provide retail voice services. As an intermediate carrier, Datablaze, LLC transmits calls between upstream and downstream providers only.

2. STIR/SHAKEN Implementation Status

Datablaze, LLC has not implemented the STIR/SHAKEN authentication framework on any portion of its network.

2.1 Basis for Exemption

Datablaze, LLC qualifies for an exemption from the STIR/SHAKEN implementation obligation pursuant to 47 CFR § 64.6302 because it functions solely as a transit/intermediate carrier that carries and transports calls and does not originate or terminate calls with end users. As such, Datablaze, LLC does not have the ability to attest to the origination of calls and therefore the STIR/SHAKEN signing obligation does not apply.

3. Robocall Mitigation Program

Although Datablaze, LLC is exempt from STIR/SHAKEN implementation, it maintains a robocall mitigation program consistent with 47 CFR § 64.6305(c) that includes the following measures:

3.1 Traffic Monitoring and Screening

- Datablaze, LLC monitors call traffic patterns on its network to identify anomalies or unusual volumes that may indicate illegal robocall activity.

- Datablaze, LLC screens upstream providers and takes reasonable steps to avoid carrying or processing illegal robocall traffic.

3.2 Traceback Cooperation

- Datablaze, LLC commits to respond fully and within 24 hours to all traceback requests received from the FCC, law enforcement, and the industry traceback consortium (USTelecom).
- Datablaze, LLC cooperates with the FCC, law enforcement, and the traceback consortium in investigating and stopping illegal robocallers that use its network to carry or process calls.

3.3 Provider Accountability

- Datablaze, LLC takes action to mitigate illegal robocall traffic upon receipt of a properly documented complaint or traceback request, including blocking or restricting traffic from providers identified as sources of illegal calls.
- Datablaze, LLC reserves the right to terminate service to any upstream or downstream provider found to be transmitting illegal robocall traffic.

4. Government Actions and Investigations

Datablaze, LLC has not been the subject of any formal Commission, law enforcement, or regulatory agency action or investigation involving findings of actual or suspected wrongdoing related to the transmission, encouragement, assistance, or facilitation of illegal robocalls or spoofing within the prior two years.

5. Certification

Datablaze, LLC certifies that all of the calls that it carries or processes on its network are subject to the robocall mitigation program described herein, consistent with 47 CFR § 64.6305(c). This program includes reasonable steps to avoid carrying or processing illegal robocall traffic and a commitment to respond fully and within 24 hours to all traceback requests from the Commission, law enforcement, and the industry traceback consortium, and to cooperate with such entities in investigating and stopping any illegal robocallers that use its service to carry or process calls.

Datablaze, LLC further certifies that any prior certification has not been removed by Commission action and it has not been prohibited from filing in the Robocall Mitigation

Database by the Commission, and that it has not implemented the STIR/SHAKEN authentication framework on any portion of its network for carrying or processing calls.
