

Company: Innovative Network Solutions LLC

FRN: 0017248576

Overview:

Innovative Network Solutions LLC is a managed service provider (MSP) that resells VoIP services through upstream carriers that implement STIR/SHAKEN caller authentication. As a reseller, Innovative Network Solutions LLC does not directly operate network infrastructure responsible for call authentication but relies on upstream providers for STIR/SHAKEN implementation.

Robocall Mitigation Practices:

To prevent illegal robocalls and ensure compliance with FCC regulations, Innovative Network Solutions LLC implements the following measures:

1. **Customer Vetting:**

All customers are vetted during onboarding to verify identity, business legitimacy, and intended use of voice services.

2. **Traffic Monitoring:**

Outbound call patterns are monitored for unusual volume, frequency, or behavior indicative of robocalling or spoofing.

3. **Acceptable Use Policy Enforcement:**

Customers must comply with strict acceptable use policies prohibiting illegal robocalls, spoofing, and fraudulent activity.

4. **Investigation and Enforcement:**

Any suspicious activity is promptly investigated. Customers found to be in violation are subject to immediate suspension or termination of services.

5. **Upstream Provider Compliance:**

Innovative Network Solutions LLC relies on upstream providers that have implemented STIR/SHAKEN and comply with applicable FCC robocall mitigation requirements.

Commitment to Compliance:

Innovative Network Solutions LLC is committed to complying with all applicable FCC robocall mitigation rules and responding promptly to traceback requests from law enforcement, regulators, and industry partners.
